

Mechanical Design Files

For academic purposes these files are available under an Open Source Hardware license. By downloading, using and/or viewing these designs, documentation and related data and information, and all content in the foregoing (collectively, the "Designs"), you agree to the following: <https://www.janelia.org/open-science/hardware-licensing>.

Please also note that the commercial use has been licensed.

ZIP file: [2p-RAM_FabricationFiles.zip](#)

This contains PDF shop drawings and STEP model files that can be used to fabricate and/or check the custom mechanical parts, and custom detection system lenses, that were designed at Janelia (almost everything except the Thorlabs gantry/cage and Jenoptik Optical Systems lens tubes for the custom excitation optics). These parts can also be purchased from previously used vendors, referencing quotes posted [here](#).
